One day, an evil virus called COVID-19 was born.  
It decided to attack all the people on Planet Earth.

COVID-19 wanted to conquer the entire planet, so it devised a battle plan and multiplied itself into millions and hid in people's hands.

When they touched anything or anyone, it would jump and stick on. This way, it started getting to thousands of humans fast!

Vihaan saw his family, teachers, friends and even Elly the elephant getting worried about COVID-19 and decided to do something about it.

Vihaan opened his secret treasure box and pulled out the “Virus Shield” with a small note on how to wear the shield.

Step 1: Stay Away from people. Maintain 1 meter distance (except for family!)

Safe distance means COVID-19 can't jump to you!

**Stay Away, Stay Away**

Step 2: Wash your hands with Soap for 20 seconds

**Wash, Wash, Wash**

**OR** Apply Sanitizer

**Rub, Rub, Rub**

Step 3: Don't touch your face, especially the Mouth, Eyes, Nose

**Don't touch, Don't touch**

Vihaan followed the 3 steps and the shield appeared around him, guarding him from the virus.

The best way to have the strongest Virus Shield was for Vihaan to **STAY AT HOME!**

If Vihaan ever went out, he had to wear a mask and repeat the steps to make the shield strong again.

Stay Away, Stay Away, Stay Away

Wash, Wash, Wash

OR Rub, Rub, Rub

Don't touch, Don't touch, Don't touch

# Now, Vihaan is a Virus Warrior!

He is protecting himself and his family  
by not letting their shield get weak.

A space-themed background with a dark blue sky, a large white moon with craters, a red and white rocket with a yellow flame, and a bright orange planet. There are also several yellow stars and purple clouds.

Sometimes, Virus Warriors fall sick too! So remember:

1. Use your elbow to cover your mouth and nose when you cough or sneeze (and not your hands).
2. Call the health helpline.
